

## DEDICATED PRODUCT DEVELOPER

Pharmaceutical company

Fertin Pharma A/S is looking for a competent and dedicated Product Developer who will be involved in ensuring a continued high level in our product development. You will become part of New Product Development (NPD), which is responsible for both the product and analytical development in the entire development chain – as from the first formulation work in the development laboratory until process design trials in commercial scale. NPD consists of 15 employees and is part of Research & Development (R&D), also working with development of gum base, IPR, and registration.

As a Product Developer your focus area is to participate in the development of medical products related to smoking cessation.

### Job description:

- You participate in planning and implementation of customer projects in laboratory, pilot and full scale including contact to external customers.
- You are involved in the development of complex products from the start formulation until designing of manufacturing processes in the production environment.
- You are part of large or small project groups in which you work together with high qualified academics, laboratory technicians and product development assistants and in which current knowledge sharing with colleagues is necessary.
- You identify and establish contact to external experts who are able to support the development work.
- You perform duties in connection with optimizing and elaborating our development processes with a focus on efficient solutions and minimization of Time-to-Market.
- You contribute to the establishment of registration documentation including support of the registration department in connection with the maintenance of registration of marketed products.

The product development of new products is effected in co-operation with the other R&D departments. As a specialist you are involved in selected development projects why it is important that personally you are motivated by collaboration. Likewise it is important that you are assertive and understand to involve your colleagues and develop a common understanding of our development and production processes.

### **Your background and personal profile:**

- You are a pharmacist, an engineer or have a similar academic background
- You have practical and theoretical experience with product development, preferably within the area of tableting (formulation and process).
- Your competencies are strong within several of these areas: GMP, statistical planning of trials, Quality by Design (QbD) and Process Performance Qualification (PPQ).
- You have experience from the pharmaceutical industry with formulation of pharmaceutical products
- You are systemic and take a general view of complicated tasks, but you are also able to go into details when necessary
- You are an extroverted person who is proactive both internally in the organization and towards external collaborators
- You are fluent in written and spoken English

### **We offer:**

- A challenging and varied job in a modern and growth-oriented pharmaceutical company
- An employment with comprehensive knowledge within smoking cessation and thus a meaningful job helping people to get a healthier lifestyle.
- A socially and academically based work environment, where we meet each other with confidence and provide you with responsibility
- Employment as soon as possible.

If you want more information about the position please contact Mette Riis, Manager NPD (+45 25 57 60 58). If you are interested you may send your application and your CV as soon as possible via the link below. Interviews are held regularly.
